OKLAHOMA CITY -- A man who says he was told that federal agents were warned before the Oklahoma City bombing testified before a grand jury Monday.

Bruce Shaw has said an agent of the federal Bureau of Alcohol, Tobacco and Firearms told him agents were warned to stay away from the Alfred P. Murrah Federal Building the morning of April 19, 1995. The ATF has denied any prior knowledge of the bombing that killed 168 people.

Shaw was at the building minutes after the bombing to search for his wife, who survived.

"I did get to tell my story," he said as he left an Oklahoma County grand jury investigating allegations of a larger conspiracy and a government cover-up in the notorious bombing.

Federal authorities say they doubt a larger conspiracy and vehemently deny any prior knowledge of the attack.

"They seemed concerned, they really did," Shaw said of the grand jurors.
