John,

I think we should wait and talk when I arrive back in the States. If the guy is telling the truth, then nothing is going to change between now and then. Why did this guy want to come forth now...to your lawyer friend? You can tell your lawyer that it is possible that every bit of this is true. They guy is either telling the truth, or has done a lot of detail research into both cases, in order to make up his story. It really all makes sense. I would like to talk to the guy. The derailment case, was actually assigned to me. That was my case.

Don

Don, My friend does not know this guy. But he is a lawyer and never heard from this guy before. My lawyer ask me if any of this could be true because of what I knew from them days. Just sharing with you. If you would like to share it with someone go for it. One never knows what life may bring us in our journey.

Take care,

John

John,

I read the information on the Oklahoma bombing and the derailment. It all sounds plausible. I guess my first question is how well do you know any of these guys that are providing the information.

Can they provide any other evidence to support what is claimed.

Also, are you aware if any of this information been given to the FBI?

It definitely sounds like the guy might know what he is talking about. There has always be a claim of a second person in the truck, when McVeigh rented the truck.

I guess we can talk more about this when we speak after 9th Sept.

Don
